Application Number 1403000816

The **Aquafeed®** is floating fish feed containing proteins and lipids which increase growth and health in fish. It produced from freshwater fish oil, the active ingredient could increase growth and amount of omega-3, 6 and 9 in flesh. The feed reduce the costs of aquaculture and value added of by-product of freshwater fish.

Process

fatty acid composition	total (g/100g)	
	Freshwater Fish Oil	Commercial Fish Oil
omega-3	1.83	34.15
omega-6	11.93	6.24
omega-9	38.72	11.94

Innovation

Aquafeed® the product innovation, contained dietary proteins and lipids which exhibited high growth and health in fish.

Aquafeed® increased the amount of omega 3, 6 and 9 in flesh.

Aquafeed® reduce the costs of aquaculture.
